

ArQule Announces Closing of Public Offering and Full Exercise of Option to Purchase Additional Shares

June 27, 2019

BURLINGTON, Mass.--(BUSINESS WIRE)--Jun. 27, 2019-- ArQule, Inc. (Nasdaq: ARQL) today announced the closing of its previously announced underwritten public offering of common stock, including the exercise in full by the underwriters of their option to purchase an additional 1,387,500 shares at the public offering price of \$9.75 per share. The exercise of the option to purchase additional shares brought the total number of shares of common stock sold by ArQule to 10,637,500 shares and increased the gross proceeds raised in the offering, before deducting underwriting discounts and commissions and estimated expenses of the offering payable by ArQule, to approximately \$103.7 million.

The Company intends to use the net proceeds of the offering to fund its clinical programs and for general corporate purposes.

SVB Leerink and RBC Capital Markets acted as joint bookrunning managers for the offering. Oppenheimer & Co. Inc. and Needham & Company acted as co-lead managers, and Roth Capital Partners, B. Riley FBR and JonesTrading Institutional Services LLC acted as co-managers for the offering.

The securities described above were offered by ArQule pursuant to an effective shelf registration statement on Form S-3 (File No. 333-232306), including a base prospectus, that was filed by ArQule with the Securities and Exchange Commission ("SEC") and automatically became effective on June 24, 2019. A final prospectus supplement and accompanying prospectus relating to the offering filed with the SEC is available on the SEC's website located at www.sec.gov. About ArQule

ArQule is a biopharmaceutical company engaged in the research and development of targeted therapeutics to treat cancers and rare diseases. ArQule's mission is to discover, develop and commercialize novel small molecule drugs in areas of high unmet need that will dramatically extend and improve the lives of our patients. Our clinical-stage pipeline consists of four drug candidates, all of which are in targeted, biomarker-defined patient populations, making ArQule a leader among companies our size in precision medicine. ArQule's pipeline includes: ARQ 531, an orally bioavailable, potent and reversible dual inhibitor of both wild type and C481S-mutant BTK, in phase 1 for patients with B-cell malignancies refractory to other therapeutic options; miransertib (ARQ 092), a potent and selective inhibitor of the AKT serine/threonine kinase, in a planned registrational trial with cohorts in Proteus syndrome and PROS to initiate in 2019; ARQ 751, a next generation highly potent and selective AKT inhibitor, in phase 1 for patients with AKT1 and PI3K mutations; and derazantinib, a multi-kinase inhibitor designed to preferentially inhibit the fibroblast growth factor receptor (FGFR) family, in a registrational trial for iCCA in collaboration with Basilea and Sinovant. ArQule's current discovery efforts are focused on the identification and development of novel kinase inhibitors, leveraging the Company's proprietary library of compounds.

Forward Looking Statements

This press release contains forward-looking statements including, without limitation, statements about ArQule's expectations regarding, among other things, the expected use of proceeds. These statements are based on ArQule's current beliefs and expectations, and involve assumptions that may never materialize or may prove to be incorrect. Actual results and the timing of events could differ materially from those anticipated in such forward looking statements as a result of various risks and uncertainties, which include risks and uncertainties associated with ArQule's drug development and other activities. For more detailed information about these risks and uncertainties, see ArQule's periodic reports filed with the SEC. ArQule does not undertake any obligation to publicly update any forward-looking statements.
